- Now allows testing of all conventional ranges listed opposite

Test Set carrying case

Link head

CONVENTIONAL TEST SET

The Conventional Test Set, part no. 53832-020, is an invaluable maintenance tool designed to give a thorough on-site check of your conventional fire detectors. It has been modified to enable testing of all detectors in Apollo's conventional ranges. These include Series 60, Series 60 Intrinsically Safe, Series 60 Low Voltage, Series 65, Series 50 and AlarmSense.

You will find it easy to use. Simple menus guide you through the test program - just select or accept your option by using the 2 buttons.

Each test set is supplied with a link head, mains adaptor and a carrying case with shoulder strap.

SELECT THE DETECTOR RANGE & TYPE

and the test set automatically carries out a series of tests.

DATA

Quiescent current
Alarm current
Holding current
Delta voltage (ionisation detectors).

MAINS ADAPTOR

Can be charged whether or not in use. Allows testing of 500 detectors when fully charged.
Part no. 53832-029

ALARMSENSE ADAPTOR

An adaptor is required if testing AlarmSense detectors. Please contact Technical Sales for more information.
